## **DETAILED ACTION**

### **Election/ Restriction**

Claims 1- 22 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-12, drawn to an ambient light photo-detecting device, classified in class 257, subclass 414.**

- II. **Claims 13-22, drawn to a display device having an arrays of photo-emissive elements, classified in class 257, subclass 088.**

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the display device can be patentable with a novel substrate or photo-emissive elements. The subcombination has separate utility such as: the claimed photo-detecting device can be used in other applications like a dark detector to trigger an electric lamp.

Art Unit: 2818

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-existent. Therefore, separate examinations would be required and restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
